

Vacancy: AV / IT Installation Engineer
Location: Devon / South West England

Introduction

The Pyramid Group are multi award winning CEDIA Members of Excellence and AVIXA members.

We create exceptional audio-visual systems within the luxury residential and commercial AV sectors. Established for over 25 years our work takes us across the UK and Europe.

Due to expansion and a growing pipeline of exciting projects, we are currently seeking to employ a full-time Audio Visual Installations Engineer to add to our growing team.

We're looking for an enthusiastic and motivated installation engineer who would relish the opportunity to grow with the business. The successful candidate will be integral to the team and able to hit the ground running.

The position will be mainly based out of our Head Office in Devon, but candidates can be located within the SW of England as travel around the region is standard. This post involves the installation of integrated AV equipment into a combination of both commercial environments and (mainly) high-end residential properties at various sites across the UK.

The ideal successful candidate will be a proven AV Installation Engineer with a good working knowledge of AV installations from 1st fix through to completion. Experience working in various sectors and liaising with senior clients would be an advantage.

Alternatively, if you are an experienced electrical contractor with some AV related experience and are wishing to get involved in the world of AV integration, we would welcome your application.

Candidate Profile & Skills

- Ability to work as part of team as well as autonomously
- Responsibility for delivering jobs and representing the company to the highest of standards with great professionalism and attention to detail
- Possess a good knowledge of installing a wide range of AV related systems, with a minimum of 3 years experience
- Proficient with the basic use of Microsoft Word, Excel & Outlook
- Ability to work from detailed CAD plans and schematics
- A full driving license is essential with a maximum of 6 penalty points
- Flexible working - working away at various locations throughout the UK is a key part to this role
- Good communication skills

As an installation engineer you will be an integral part of the team delivering full turnkey projects to the highest of standards.

Role Requirements

Responsibilities to include:

- Installation of equipment at 1st and 2nd fix level in the construction of cinema rooms, smart homes, AV systems infrastructure and CCTV Security systems within the residential sector as well as meeting/training rooms within commercial environments
- Rack building to the highest standards
- System commissioning, handover and client training
- Data and telecom networks installation and integration

- Job specific document creation and management reporting
- Technical support services including fault investigation and maintenance of installed systems
- Control4 and/or Lutron experience is beneficial but not essential as full dealer training will be provided

Additional skills, which would be of benefit:

- Electrical and network installations experience and/or qualifications
- Network testing and commissioning
- CCTV and fire alarm systems installation experience
- Satellite & ariel systems installation and experience

Benefits

- Training via CEDIA and AVIXA will be provided to support your growth within our company, along with various career progression opportunities.
- Provision of a company van, laptop and mobile phone with full data package as standard.
- Salary range TBC depending on experience

Closing date for applications is 30th April 2021
