CEDIA Member Since 2014

The Pyramid Group set out to design a focussed and dedicated home technology and cinema showroom in a part of the UK that is not known for having such a facility, and, most importantly, to do so in a manner that was as high-quality as the company could achieve.

The main space is designed to illustrate a range of integrated technologies, audio, and speaker options in regards to aesthetic and cost, all brought together with a simple to use control interface. The cinema room is used to demonstrate the possibilities and quality achievable in a small but dedicated space — both for cinema and TV use, but also music listening in an acoustically excellent space. The room is equipped with a stunning Dolby Atmos 7.2.4 setup featuring Artcoustic, Trinnov, Oppo, Kaleidescape, DT Screens, Epson, and WyreStorm — all controlled via Control4.
