About Us

Pyramid has been creating and installing bespoke and award winning lighting systems, integrated smart buildings and private cinemas for over 20 years.

Our expert team has extensive experience of working in the residential environment, and can offer a depth of knowledge that benefits architects, interior designers and property developers to make the best out of the possibilities available.

We are proud CEDIA Members.

Please see our website for more on who we are, case studies and examples of our work over the years.

We Create Beautiful Award Winning Cinemas

As award winning cinema and media room designers, our team of expert Designers & Engineers will create your dream theatre from start to finish using the very best acoustics & fabric treatments, furniture & lighting, alongside industry leading cinema brands.

kaleidescape®

WINNER

Best Home Cinema
EMEA Level II

We work with a wide range of suppliers in order to realise the style and quality required for any project, as well as providing easy to use controls to manage your beautiful lighting schemes, and ensure maximum energy efficiency too!

Lighting Design

Our Lighting Division has many years of experience in the design of architecturally sensitive lighting schemes for interiors, exteriors and landscapes.

As independent designers we take great care when conceiving a lighting design and work closely with all stakeholders to ensure that the environment is lit sensitively, and in tune with all architectural and interiors ideals.

Design Consultancy Services

Our award winning team has a over 20 years experience of high end residential and marine projects across the UK, EMEA and the US.

Over the years we have learnt that every project is unique, and we approach every one with a keen eye for detail, reliability and quality, and all backed up by our extensive support services.

Our design teams work closely with owners, architects and interior designers to realise their aspirations and guide them through the complex range of options available. The sooner this process starts the more efficient and successful the outcomes, in other words at the design stage!

We ensure that the end result is of the highest quality, meets budgets, and most importantly enhances the experience that well designed AV and lighting can provide home owners.

Smart Home Solutions

Using Control 4 and other carefully selected partners, we can seamlessly integrate with your lighting, heating, security, and the all important multi-zoned audio systems.

All of these can be controlled from your phone or tablet with ease, avoiding the need for separate controllers and help to simplify control.

Multi-Zone Audio Streaming

Using wired or wireless audio streaming devices we can create multi-zoned systems using your favourite music streaming services such as Apple Music, Tidal, Spotify or Deezer.

Voice Control

Use your voice assistant with Control 4 and other integration brands allowing hands free control of lighting scenes, thermostats, blinds, music and entertainment!

Speakers

Combine your music streaming with speaker options such as invisible systems, beautiful speakers from Artcoustic or in-ceiling options from Bowers & Wilkins. Whichever style you choose, you will have a great sounding system that suits your interior design. Why not add a system to your garden for your next barbecue too!

Lighting Control

Using smart lighting systems not only improves the ambience of the home with convenient scene settings, but offers large energy savings and provides 'away from home' occupancy mimicking as a deterrent, another effective security feature.

Blinds & Shading

Control your blinds or curtains with an automated system and you have complete control of your room shading. Blinds can even be programmed to respond to internal temperatures in order to balance solar gain in the home.

Door Entry Systems

Enabling remote access to your property through a door entry system provides incredible peace of mind as you can see who is at the door and decide if you want to let them in, even when you are not home!

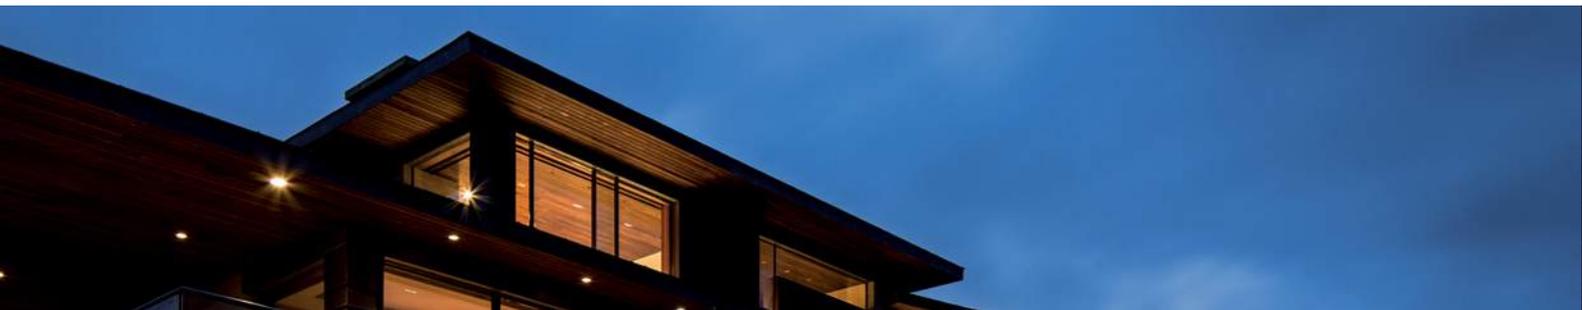

Heating & Comfort

You can improve energy usage again by gaining remote monitoring and access to a smart thermostat, ensuring that no matter where you are your home will be running smoothly and cost-effectively.

CCTV

Access the CCTV within your property via your Control 4 app for remote viewing of images. The system can email or send text alerts if you are away from the home, and you can view cameras whenever you like for peace of mind!

THE PYRAMID GROUP

AV Systems

We design, install and support complex AV solutions for both commercial and residential clients across EMEA
